Custom Software

Magnetek's Engineering Group can furnish custom drive software to meet unique application requirements. Please consult factory.

DataLogger

Designed to simplify troubleshooting and gather information for preventative maintenance, the DataLogger is a recording device for IMPULSE®•Series 3 and Series 2 Crane Controls.

Click here for more information on the DataLogger Series 3 Drive Monitoring Device.

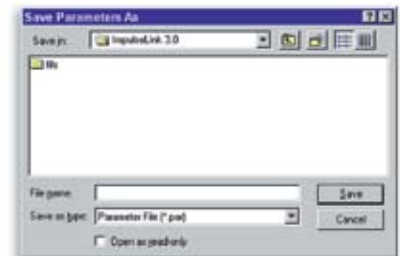

IMPULSE®•Link 4.0

Designed to communicate with the IMPULSE®•Series 3 Crane Controls, IMPULSE®•Link is a Windows-based interactive drive software package.

This user-friendly software allows you to accomplish the following:

- Upload and download drive parameters
- Adjust drive parameters online or offline
- View and print drive parameters
- View complete parameter descriptions
- Compare drive parameters

The Save Parameters As allows the user to save parameters to a different parameter file or create a new parameter file.

Download Free IMPULSE®•Link 4.0 updates

After Market Product Support
